The APR for Cash Advances may vary monthly and will be reset on the first date of each billing cycle by adding the index to a margin of **21.74** percentage points. The index is determined monthly and it is the Prime Rate published in the northeastern edition of **The Wall Street Journal** in its Money Rates table on the first day of the preceding month rounded up to the nearest one-quarter of a percentage point. If the first day of the preceding month is not a business day, we will use the Prime Rate published on the next business day.
